Subject: Sending 605 Exchange Notice to Bell Atlantic for Maintenance Tree Trimming

I'd like to start a new practice.

I'd like to attempt to collect 25% of our tree trimming maintenance costs from Bell Atlantic.

Our agreement with them allows each Company to perform maintenance and these costs be divided 75% electric and 25% telephone IF there is a NEED. The problem we've had is that Bell Atlantic typically says they do not have a NEED and therefore do not have \$ in their budgets for maintenance.

Given all this I'd like to do the following:

- 1) Have Chris provide Kim with the necessary tree contractor documents which identify the maintenance trimming already performed. (acct 242.01.09)
- 2) Transpose or attach this info. onto a 605 form (Exchange of Notice).
- 3) Send this to the appropriate Engr.(s) for Bell Atlantic.
- 4) Have a tracking mechanism that allows us to follow up on these 605's if Bell Atlantic does not return them after a reasonable period of time. (I believe our agreement with them stipulates a time frame that 605's should be returned).
